PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years building large-scale **React and TypeScript** applications, including nearly 4 years shaping frontend architecture for a multi-tenant SaaS platform serving **200+ manufacturer accounts**. Designed and built the frontend of a costing engine that **cut quotation time from ~3 days to under 5 minutes** (Best Performer of the Year), scaled a design system across **4+ portals** with **~40%** faster UI delivery, and holds releases to **initial load under 1.8s, Lighthouse 90+ and under 2% post-release defects**. Sets coding standards, reviews code, mentors engineers and partners with product, design and backend teams from discovery workshops through on-call production support.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, React Hooks, Redux Toolkit, Context API, React Router, Remix, Formik, Yup

Architecture & Performance: Frontend Architecture, SPA, Multi-Tenant SaaS, Core Web Vitals, Code Splitting, Lazy Loading, Rendering Optimisation, PWA, i18n

Design Systems & UI: Component Libraries, Storybook, Chakra UI (CSS-in-JS), styled-components, Tailwind CSS, Fluent UI, Figma-to-Code, Keyboard Accessibility

APIs, Real-Time & Auth: RESTful APIs, WebSockets, Axios, Webhooks, OAuth, SSO (Google, Microsoft), Role-Based Access Control, Frappe/ERPNext, Razorpay

Data Visualisation: Three.js (3D/CAD), Recharts, Chart.js, React Table, Virtualisation

Testing & Quality: Jest, React Testing Library, Cypress, Cross-Browser Testing, ESLint

Observability & Analytics: Datadog RUM, Sentry, GA4, Google Tag Manager, A/B Testing

Tooling & Delivery: Vite, Webpack, Git, GitHub, CI/CD, Firebase (Google Cloud), Linux, Node.js/Express, MySQL, Agile/Scrum, SAFe 5

Also: Microsoft Teams Tab Apps (TeamsJS), AI tools (Cursor, Claude Code)

EXPERIENCE

Karkhana.io | Bengaluru, India | *Apr 2025 – Jun 2026*

Senior Full Stack Developer (Frontend Engineering)

- **Owned frontend architecture** for the Costing Engine, a large React/TypeScript SPA with Three.js and Redux Toolkit, staying responsive as model complexity grew **10× in a year**.
- **Scaled the company-wide React design system** (Chakra UI, Storybook, Vite) across **4+ portals**, setting coding standards and cutting cross-team UI build time by **~40%**.
- **Set frontend performance standards** (Core Web Vitals, code splitting, lazy loading), holding initial load **under 1.8s** and Lighthouse scores **above 90**.
- **Delivered 3–5 production features per quarter** end to end, from technical design and REST API integration through release, with **under 2% post-release defects**.
- **Mentored interns and coached engineers** through code reviews and design-system practices, and wrote technical design documents for new features.

- **Owned production reliability on the on-call rotation**, triaging issues with Sentry and Datadog RUM and coordinating releases with DevOps.
- **Partnered with product, design and backend teams** through discovery workshops, scope negotiation and backlog prioritisation across parallel portal projects; presented the product to the CEO and live at IMTEX 2025.

Karkhana.io | Frontend Software Developer | *Jul 2022 – Mar 2025*

- **Designed and solely built the frontend** of the Automated Costing Engine (React, TypeScript, Redux, Three.js, Chakra UI), cutting quotation cycles from **~3 days to under 5 minutes**.
- **Shipped 4+ production portals in 12 months** on a multi-tenant SaaS platform (React, Remix, TypeScript), driving **30% higher user engagement** and onboarding **200+ manufacturer accounts**.
- **Designed the Redux Toolkit state architecture** adopted across 4+ portals, reducing state-related production defects by **~60%**.
- **Integrated 60+ REST API endpoints** using TypeScript and Axios, reducing QA-reported integration defects by **~50%**.
- **Built authentication and multi-language flows**: OAuth and SSO (Google, Microsoft) with role-based access control, multi-step forms and i18n.
- **Built Three.js 3D/CAD visualisation and real-time dashboards** (WebSockets, Recharts, React Table) with filters, drill-downs and CSV/Excel export.

GlobalLogic | Noida, India | *Oct 2019 – Jan 2022*

Software Engineer (promoted from Trainee)

- **Built 20+ reusable React components** for an enterprise CSR dashboard, standardising UI across 3 squads and cutting feature development time by **~25%**.
- **Modernised legacy VB6/VB.NET modules** through incremental migration to React, reducing recurring production issues by **~30%** with no business disruption.
- **Delivered 3+ React/Node.js prototypes**, including a geographic mapping interface with custom markers, cutting feedback cycles from **2 weeks to under 4 days**.
- **Coordinated delivery for a 12-person Agile squad**, raising on-time releases from **~70% to 95%+** over 8 sprints.

EDUCATION

Government Engineering College Wayanad, Kerala | *Aug 2015 – Jul 2019*

B.Tech in Computer Science & Engineering | APJ Abdul Kalam Kerala Technological University

CERTIFICATIONS & AWARDS

- **Certified SAFe 5 Practitioner** — Scaled Agile Framework
- **Karkhana.io Best Performer of the Year** — Costing Engine delivery & component library rollout
- **GlobalLogic ACE of the Month, Spotlight of the Month, ML Hackathon Champion** — 1st place
