PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6 years of experience building scalable React and TypeScript applications. Led frontend development of an automated costing engine at Karkhana.io, enabling real-time CAD rendering with Three.js and reducing customer quote time from 3 days to under 5 minutes. Delivered 4+ production portals in 12 months, increasing user engagement by 30% and onboarding 200+ manufacturer accounts. Built a company-wide Chakra UI + Storybook design system and improved state reliability by reducing production bugs by ~60% through optimised Redux architecture. SAFe 5 certified. Seeking to contribute to product-driven teams solving complex UI, performance, and frontend architecture challenges.

EXPERIENCE

Karkhana.io | Bengaluru April 2025 – Present

Senior Full Stack Developer (Frontend-Focused) ← Promoted

- **Led frontend architecture** for Karkhana's Costing Engine using React, TypeScript, Three.js, and Redux Toolkit, sustaining real-time 3D CAD rendering as model complexity grew **10× in 12 months**.
- **Shipped 3–5 production features per quarter** with **<2% post-release defect rate** via end-to-end full-stack delivery using React, TypeScript, and Frappe REST APIs.
- **Own and scale the company-wide component library** (React + Chakra UI + Storybook + Vite), scaling adoption across 4+ portals and cutting cross-team UI build time **~40%**.
- **Defined frontend performance standards** (Core Web Vitals, code-splitting, lazy-loading), holding initial page load **under 1.8 s** and Lighthouse scores **past 90** through continued feature growth.
- **Represented the product at IMTEX 2025**, delivering **live demos** of the costing engine to industry users, addressing technical queries, and driving product adoption through hands-on engagement.
- Gathered and translated customer feedback into actionable **product improvements**, influencing **feature prioritisation** and enhancing usability of the costing engine platform.

Frontend Software Developer July 2022 – March 2025

- **Architected and solely engineered** the frontend of an Automated Costing Engine (React, TypeScript, Three.js, Redux, Chakra UI), cutting customer quoting cycles from **~3 days to under 5 minutes**.
- **Shipped 4+ production manufacturing portals** in 12 months (React, RemixJS, TypeScript), lifting user engagement **30%** and onboarding **200+ manufacturer accounts**.
- **Built a scalable design system** from scratch using React, Chakra UI, and Storybook, eliminating duplicate component work and cutting feature build time **~40%** across the team.
- **Integrated 60+ REST endpoints** with a Frappe backend using TypeScript and Axios, reducing QA-reported integration bugs **~50%** and unblocking weekly releases.
- **Designed Redux Toolkit state architecture** adopted across 4+ portals, dropping state-related production bugs **~60%** and cutting new-engineer ramp-up to **under 1 week**.
- **Optimised cross-browser performance** (Vite, code-splitting, lazy-loading), pulling initial page load from **~3.4 s to ~1.8 s** and pushing Lighthouse scores **past 90**.
- Led **Progressive Web Application (PWA)** enablement for **React** manufacturing portals using **service workers** and caching strategies, improving reliability and usability across mobile and low-bandwidth environments.

GlobalLogic | Noida *October 2019 – January 2022*

Software Engineer (promoted from Trainee → Associate)

- **Built 20+ reusable React components** for a CSR dashboard (React, JavaScript, CSS3), standardising UI patterns across 3 product squads and cutting feature build time **~25%**.
- **Delivered 3+ prototypes and POCs** (React, Node.js), shortening stakeholder feedback cycles from **2 weeks to under 4 days** and unblocking 2 enterprise deals.
- **Modernised legacy VB6 modules** with incremental React refactors, eliminating **~30% of recurring production tickets** with zero business downtime.
- **Owned deliverable tracking for a 12-person squad** (JIRA, SAgile), lifting on-time release rate from **~70% to 95%+** across 8 sprints.
- Worked closely with product managers, backend engineers, and business stakeholders to deliver features aligned with business requirements and release timelines.
- **Cleared CI/CD bottlenecks** with DevOps (Jenkins, Git), cutting deployment time **~50%** and shifting release cadence from biweekly to weekly.
- **Won ACE of the Month and Spotlight of the Month** awards for reusable component development and on-time delivery.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux Toolkit, Chakra UI, RemixJS, Tailwind CSS, React Router, Three.js, Progressive Web Apps (PWA)

Performance: Core Web Vitals, Code Splitting, Lazy Loading, Lighthouse Optimization

Backend & Frameworks: Frappe, REST APIs, Axios

Build & DevOps: Vite, Git, GitHub, CI/CD Pipelines, Parcel, Storybook

Testing: Cypress, Jest, React Testing Library

Methodologies: Agile, SAgile, Clean Coding Practices, Performance Optimisation, Cross-browser Compatibility

EDUCATION

Government Engineering College Wayanad, Kerala *Aug 2015 – Jul 2019*

B.Tech in Computer Science & Engineering — CGPA: 7.27

APJ Abdul Kalam Kerala Technological University • Specialisation: Machine Learning / AI & High-Performance Supercomputing

Jawahar Navodaya Vidyalaya Mahe, Pondicherry *Jun 2013 – Mar 2015*

High School Diploma in Computer Science — 79%

CERTIFICATIONS

- **Certified SAgile 5 Practitioner** — Scaled Agile Framework
- **Complete Web Development Bootcamp** — Udemy
- **Programming Foundations: Web Security** — LinkedIn Learning
- **Agile Software Development: Clean Coding Practices** — LinkedIn Learning

AWARDS & RECOGNITION

- **Karkhana.io Best Performer of the Year** — 90+ score — Costing Engine delivery & component library rollout
- **GlobalLogic ACE of the Month** — On-time delivery leadership across 12-person squad
- **GlobalLogic Spotlight of the Month** — Reusable UI component architecture and development
- **GlobalLogic ML Hackathon Championship** — First place among freshers
